PROFESSIONAL PROFIL

Passionate about cutting-edge technologies in AI, notably in **Machine Learning** (ML) and **Deep Learning** (DL), I specialize in pioneering **Neural Network** (NN) methods for analyzing physical **dynamics**, notably impacting fields like weather forecasting.

This proficiency enables me to develop DL/AI solutions for complex real-world challenges by innovating upon existing methods, and integrating DL approaches into existing non-ML systems. Additionally, it provides me with opportunities to work on other topics, such as **Computer Vision** (CV).
